Jervis Smith
Oxford

18 Dec^br : 1900

28, NORHAM GARDENS,
OXFORD.

My dear Thompson.

Please teach my best thanks for your very kind letter which if I had not been hard pressed with exam: and a Trinity old I shd: have ans: long before.

= I am glad that such a man as Townsend is come back. as he is full of go, & will fan the fires embers he may find warm here.

= Chilton is raging, as he was backing Walker. or White

DSI

all he knows. Lord Kelvin took
an boundless trouble about
Townsend. making a purpose
journey on his behalf.

= H. Wilde has sent me his
correspondence with the
Soc: of Arts. It is one thing
to be a fool, but quite
another to write a monograph
on the fact.

= I am repeating some of
Coulombs experiments on
the work done is carried
out by lightning
loads in different ways.
I find that it not difficult
to get a grasp of the rel:
from wh: the acceleration
at any time may be found.
With our best wishes to You
& Mrs. Thompson.

Believe me
Yours Sincerely.
F. J. Jervis-Smith
